

# **Vehicle History Report**

### **VEHICLE DETAILS**

Chassis number <sup>1</sup> :	BNR32-217411	Title information <sup>2</sup> :	<b>,</b> 60	Deregistered to Export	0
Manufacture date:	1992-03		<b>u</b> _	-	
Make:	NISSAN	Accident / Repair:	<b>I</b> ⇒	Problem found	×
Model:	SKYLINE	Odometer rollback:		No problem	
Body:	E-BNR32	Manufacturer	~		-
Grade:	GT-R	recall:	۹	No problem	$\checkmark$
Engine:	RB26DETT	Safety grade <sup>3</sup> :	00	No data	0
Drive:	4WD	Contamination			
Transmission:	F5	risk:	Å	No problem	$\checkmark$

#### This vehicle does not qualify for Buyback Guarantee

#### **Average Market Price**

Unfortunately, this vehicle does not qualify for our Buyback Guarantee program.

About Buyback Guarantee

This CAR VX Vehicle History Report is based only on Information supplied to CAR VX, LTD and available as of 2020-06-20 20:52:22. Other information about this vehicle, including problems, may not have been reported to CAR VX, LTD. Use this report as one important tool, along with a vehicle inspection and test drive, to make a better decision about your next used car.

## ACCIDENT / REPAIR HISTORY

Problem type	Reported	Date reported	Data source	Details	Airbag
Collision	Reported				
_	_	2019-05-22	MIRIVE	Repaired	ОК
Malfunction	Not reported				
Theft	Not reported				
Fire damage	Not reported				
Water damage	Not reported				
Hail damage	Not reported				

### **ODOMETER READINGS HISTORY**

Date reported	Data source	Odometer reading (Km)
2005-10-19	MLIT	88200
2007-10-25	MLIT	111200
2019-05-22	MIRIVE	118130

# USE HISTORY

Use in the contaminated regions <sup>4</sup>	Radioactive contamination test fail <sup>5</sup>	Commercial use
Not reported	Not reported	Not reported

# **DETAILED HISTORY**

Event date	Location	Odometer reading (Km)	Data source	Details
1992-03			NISSAN	Manufactured
1992-03			MLIT	First registration
2005-10-19		88200	MLIT	Inspection
2007-10-25		111200	MLIT	Inspection

	2019-02-22	Gunma			MLIT	Last registration
	2019-05-22	Saitama	118130		MIRIVE	Auctioned
N	IANUFACT	URER RECAL	L HISTORY			
	Date report	ted	Data source		Affected part	Details
	Not repo	orted

	Overall Collision Safety Ratings					
	Driver's seat Front passenger's seat					enger's seat
	Points	Evaluation	Goal average	Poi	nts Evaluation	Goal average

\* In order to accurately differentiate between the evaluations of different vehicles, a standard is set based on current technology. Up to 6 points out of 12 is given level 1 and the rest of the range is divided up into equal parts, which are respectively assigned to level 2 (more than 6 points but 7.5 or less), level 3 (more than 7.5 points but 9 or less), level 4 (more than 9 points but 10.5 or less) or level 5 (more than 10.5 points).

### Braking performance tests <sup>7</sup>

Dry road	5
Wet road	6

### **VEHICLE SPECIFICATION**

1st gear ratio	2nd gear ratio	
3rd gear ratio	4th gear ratio	
5th gear ratio	6th gear ratio	
Additional notes	Airbag position, capacity	
Body rear overhang	Body type	COUPE

Chassis number embossing position		Classification code	15
Cylinders	6	Displacement	2568cc
Electric engine type		Electric engine maximum output	
Electric engine maximum torque		Electric engine power	
Engine maximum power	280ps(206kW)/6800rpm	Engine maximum torque	36.0kg∙m(353.0N∙ m)/4400rpm
Engine model	RB26	Frame type	
Front shaft weight	870	Front shock absorber type	
Front stabilizer type		Front tires size	225/50R16 92V
Front tread	1480	Fuel consumption	7.0km/l
Fuel tank equipment	72	Grade	GT-R
Height	134	Length	454
Main brakes type		Make	NISSAN
Maximum speed		Minimum ground clearance	
Minimum turning radius	5.3m	Model	SKYLINE
Model code	E-BNR32	Mufflers number	
Rear shaft weight	610	Rear shock absorber type	
Rear stabilizer type		Rear tires size	225/50R16 92V
Rear tread	1480	Reverse ratio	
Riding capacity	4	Side brakes type	
Specification code	6134	Stopping distance	
Transmission type	F5	Weight	1480
Wheel alignment	4WD	Wheelbase	2615
Width	175		

AUCTION DATA

### Date: 2019-05-22, Auction: MIRIVE, Lot #: 85060

Date:	2019-05-22	Lot #:	85060
Auction name:	MIRIVE	Region:	Saitama
Make:	NISSAN	Model:	SKYLINE
Reg. year:	1992	Mileage (km):	118130
Displacement (cc):	2600	Transmission:	F5
Color:	WHITE	Model code:	BNR32
Result:	sold	Auction grade:	R
Problem type:	Collision	Problem scale:	Repaired
Contaminated:	No	Airbag:	ОК

<sup>1</sup> Chassis number – a unique identification number of the vehicle in Japan (same as VIN in the USA or Europe)

#### <sup>2</sup> Title information:

Registered – qualified for driving in Japan

Deregistered Temporarily – not qualified for driving in Japan, usually a temporary title during the ownership change

Deregistered Completely – not qualified for driving in Japan, the vehicle is determined to be scrapped Deregistered to Export – not qualified for driving in Japan , the vehicle is determined to be exported

<sup>3</sup> Determining the overall collision safety performance evaluation – For the driver's seat, the results of the full-wrap frontal collision test, offset frontal collision test, and side collision test are added together and evaluated to 6 different levels. For the Frontal passenger's seat, the results of the full-wrap frontal collision test and the side collision test (results for the driver's or the front passenger's seat are used) are added together and evaluated to 6 different levels.

Regular vehicle inspection – All vehicles in Japan must undergo regular vehicle inspections (shaken). New cars need to be tested after three years, and then vehicles must be tested every two years thereafter. A vehicle inspection (shaken) is compulsory for all vehicles with an engine size over 250cc. It ensures that all vehicles on the road are properly maintained and safe to drive. The test also checks that vehicles have not been illegally modified; if they are found to have been modified, they are not allowed on the road.

<sup>4</sup> **Use in the contaminated regions** – The Fukushima Daiichi nuclear disaster was a catastrophic failure at the Fukushima I Nuclear Power Plant on 11 March 2011, resulting in a meltdown of three of the plant's six nuclear reactors. As a result, some areas in the following prefectures were contaminated: Fukushima, Miyagi, Ibaraki, Tochigi.

<sup>5</sup> Radioactive contamination test – radioactive contamination inspection that was started in July 2011 as a preventive measure for exporting contaminated vehicles from Japan. The inspection is being conducted since in all sea ports of Japan under the supervision of The Japan Harbor Transportation Association (JHTA).

MLIT – Ministry of Land, Infrastructure, Transport and Tourism.

<sup>6</sup> Japan New Car Assessment Program – the Ministry of Land, Infrastructure, Transport and Tourism (MLIT) and the National Agency for Automotive Safety & Victims' Aid (NASVA) have taken measures for safety, one of which is to assess commercially available vehicles through a variety of safety performance tests and release the resulting information compiled into the "New Car Assessment Program". The objective of Japan New Car Assessment Program is to increase the use of safe automobiles by providing an environment in which users can easily select such vehicles. This also promotes the development of safer vehicles by automobile manufacturers. Neck injury protection for rear-end collision performance test , rear seat passenger's protection for frontal collision performance test, rear passenger's seat belt usability evaluation test and seat belt reminder for passengers evaluation test are started in FY2009.

<sup>7</sup> **Braking Performance Tests** – Braking performance is determined by the shortness of the distance in which a vehicle can stop and the stability of the vehicle at the time of braking. This test is performed under wet and dry road conditions for a vehicle which has both a driver and a front passenger. The distance it takes for the vehicle to stop and the stability of the vehicle at the time of braking is evaluated for when the vehicle is stopped abruptly while traveling at a speed of 100km/h. The stopping distance and vehicle speed have been measured by using GPS since FY2009.
